QGIS Application - Bug report #17371
Problem

2017-11-01 09:22 AM - Jorge Useche

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	GRASS			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:	Ubuntu 17.10 Artful Aardvark	**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	fixed/implemented	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	25268	

Description

I'm using the instructions of https://github.com/qgis/QGIS/blob/master/INSTALL#L186 to compile QGIS 3 in Ubuntu Artful, but in process of "make -j8" (In my case) I'm getting the error:

    Scanning dependencies of target translations
    [96%] Generating ../output/i18n/qgis_ar.qm
    lrelease: could not find a Qt installation of ''
    i18n/CMakeFiles/translations.dir/build.make:97: recipe for target 'output/i18n/qgis_ar.qm' failed
    make[2]: *** [output/i18n/qgis_ar.qm] Error 2

- Status changed from Open to Feedback

Apparently you Qt is not installed/configured correctly.   Did you set QT_SELECT=5?

I'm seen that error corresponds to https://stackoverflow.com/questions/16607003/qmake-could-not-find-a-qt-installation-of

And I've solve it using $ sudo apt install qt5-default

I've report this dependency in previous issue #17177

Thanks :)
