

QGIS Application - Bug report #17375

Print Composer ignores width values from expression

2017-11-01 05:24 PM - zimirrr leonid

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Map Composer/Printing	
Affected QGIS version:	2.14.17	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: not reproducible
Crashes QGIS or corrupts data:	No	Copied to github as #: 25272

Description

Hello. I found strange thing.

I have a project where lines width is calculated with such expression:
"width_coefficient" + to_real(@TEST_VAR_WIDTH)
where "width_coefficient" is column and @TEST_VAR_WIDTH global variable in qgis.

Here how layer looks like when @TEST_VAR_WIDTH = 0

And now @TEST_VAR_WIDTH = -0.5

Everything works fine but when I try to print as pdf from composer I get all lines.
See export_pdf.pdf

I've created test qgis project with one layer and composer. You can try it yourself.

QGIS version 2.14.17-Essen
Compiled against Qt 4.8.5
Compiled against GDAL/OGR 2.2.1
Compiled against GEOS 3.5.0-CAPI-1.9.0

History

#1 - 2017-11-02 12:55 PM - Giovanni Manghi
- Status changed from Open to Feedback

what about 2.18.14/master?

#2 - 2018-08-15 07:37 PM - Giovanni Manghi
- Resolution set to not reproducible
- Status changed from Feedback to Closed

Closing for lack of feedback.
