

QGIS Application - Bug report #17377

QgsSettings::beginGroup() is superior to QgsSettings::Section

2017-11-01 11:00 PM - Borys Jurgiel

Status:	Closed	
Priority:	Normal	
Assignee:	Nathan Woodrow	
Category:	Unknown	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: duplicate
Crashes QGIS or corrupts data:	No	Copied to github as #: 25274
Description		
<p>Just a simple example:</p> <p>QgsSettings settings; settings.beginGroup("my_group"); settings.setValue("my_key", 7, QgsSettings::Section::App)</p> <p>results with:</p> <p>[my_group] app/key=7</p> <p>Shouldn't beginGroup() optionally accept QgsSettings::Section? Like that:</p> <p>void beginGroup(const QString &prefix, const QgsSettings::Section section = QgsSettings::Section::NoSection);</p> <p>I marked it as a bug, as it causes rather unexpected results and makes beginGroup() more or less useless.</p>
