Pull Request or Patch supplied:		Resolution:
Easy fix?:	No	Copied to github as #: 25303
Description		
<p>Good Moring,</p> <p>In order to create reports with maps and table from the print composer, we would like to highlight some rows or cells in the attribute table.</p> <p>Conditionnal formatting is great but does not exists on the print composer side.</p> <p>For now I use a workaround by generating tables as html code on the database side but it's just a workaround with inconvenients</p> <p>An "easy" step could be to allow the use of expression and/or field value in the table appearence dialog boxes as this one :</p> <p>https://docs.qgis.org/2.18/en/docs/user_manual/print_composer/composer_items/composer_attribute_table.html#appearance</p> <p>Thanks a lot for your attention</p> <p>Mathieu Bossaert</p>
