

QGIS Application - Bug report #17433

QGIS in idle state after a while

2017-11-09 06:10 PM - matteo ciccarelli

Status:	Closed	
Priority:	Low	
Assignee:		
Category:	Windows Package	
Affected QGIS version:	2.18.14	Regression?: No
Operating System:	Windows 10 64	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: no timely feedback
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 25330
Description when screen saver is active (Boinc project one) I'm unable to get control of the QGIS main window (that I can see on the application bar) and Windows 10 shows me other windows too, the ones related to plugins that I've previously used. It occurs randomly when I leave the PC for some time. I have to force QGIS closing		

History

#1 - 2017-11-09 06:13 PM - Giovanni Manghi

- Priority changed from Normal to Low
- Assignee deleted (matteo ciccarelli)
- Category changed from Processing/QGIS to Windows Package

#2 - 2019-01-21 12:34 AM - Jürgen Fischer
