

QGIS Application - Bug report #17472

Clicking the "In Project" checkbox in Bookmarks panel corrupts the bookmarks list

2017-11-15 05:40 PM - Harrissou Santanna

Status:	Closed	
Priority:	High	
Assignee:	Alessandro Pasotti	
Category:	Unknown	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed/implemented
Crashes QGIS or corrupts data:		Copied to github as #: 25369
Description see the attached image. I ended up with this by clicking the ckeckbox in the "In Project" column from the bookmarks panel. Each time i checked a bookmark, the row became blank (all values cleared). Then I restart QGIS and I got many rows populated with 0; it looks like the bookmarks I checked are back but they lost their SRID (set to 0 - which is a common issue with checking "In Project" in 2.18). This makes the button unusable.
