

QGIS Application - Feature request #17495

Add DXF export functionality to processing

2017-11-20 01:52 AM - Nyal Dawson

Status:	Open	Resolution: Copied to github as #: 25392
Priority:	Normal	
Assignee:	Victor Olaya	
Category:	Processing/QGIS	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
<p>Currently DXF export is only available from the project menu -> "DXF export" action. We should expose this as a processing algorithm so that it can be utilised by models, and then just call the processing algorithm from the Project Menu action.</p>

I confirm. It would be nice to have this feature.

BTW:

Batch-Import DXF/DWG via processing would be nice too...(i mean the native import in the Project Menu).

For Instance: You have many DXF/DWG in a directory (and subdir's) which you can import in one GPKG (layer group by geometrytype or every dxf layer is a GPKG layer or....or....many ideas -->inspired by FME
