Pull Request or Patch supplied:	No	**Resolution:**		
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	25393	

Description

In QGIS 2.18, if one specified conditional formatting on a row (e.g. inactive features are crossed-out or red), the same formatting was used in the combobox of a relation reference widget, to distinguish active from inactive features.

In current QGIS master, this conditional formatting is not applied.

It is a regression, since it worked in 2.18.
