

QGIS Application - Bug report #17511

adding two instances of the same gpkg layer and editing on one of them crashes qgis

2017-11-21 06:02 PM - Alessandro Pasotti

Status:	Closed	
Priority:	High	
Assignee:		
Category:	Data Provider/OGR	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: not reproducible
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 25408
Description See #17507 for the sample project and data steps to reproduce - load the sample project - by using the ogr browser, load the gpkg layer (second instance) - start editing the second instance - add some features - end editing (sometimes it crashes here!) - right click on the first instance (sometimes it crashes here!)

@Alessandro I can't reproduce any crash with master. Unfortunately the <http://dpaste.com/2MM3ZC7> has expired since you create it. Do you still have it ?
If you can't reproduce any more, we'd better close this one

#6 - 2018-06-01 04:36 PM - Alessandro Pasotti

- Resolution set to not reproducible

- Status changed from Feedback to Closed

I cannot reproduce it anymore.
