

QGIS Application - Bug report #17541

Processing Toolbox adds decimal places in attributes, all fields have the same number.

2017-11-23 10:00 PM - Pawel Stankiewicz

Status:	Closed	
Priority:	Normal	
Assignee:	Victor Olaya	
Category:	Processing/Core	
Affected QGIS version:	master	Regression?: No
Operating System:	Windows 10 64	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: not reproducible
Crashes QGIS or corrupts data:	No	Copied to github as #: 25438
Description		
Provider independent (SAGA and QGIS).		

History

- Status changed from Open to Feedback

Need a lot more detail here - it's certainly not reproducible here.

#2 - 2017-11-24 09:15 AM - Pawel Stankiewicz

Should I attach a file or record action on a screen? Any .shp with different numbers of decimal places in attributes should be enough.

yes, or alternatively add the list of exact steps you follow (also add sample data).

#4 - 2017-11-24 07:04 PM - Pawel Stankiewicz

- File Test.zip added

Preparing files and testing I've found decimal places are added when results are in a temporary layer no matter whether is in from Processing Toolbox or Vector menu. Saving to a file saves decimal places.

In Processing Toolbox bar write „Vo". From QGIS geotools choose „Voronoi polygons". Run it. In the Voronoi polygons attribute table all numbers with decimal places have 5 ones. In the original file there are from 1 to 4.

#5 - 2017-11-24 07:34 PM - Giovanni Manghi

- File Screenshot_20171124_183441.png added

update to latest master revision code. Try on a clean environment/installation. Thanks!

#8 - 2017-11-26 10:45 AM - Pawel Stankiewicz

Thanks for your answer. How to make a clean environment? Is it enough deinstallation first and deleting C:\Users\me\qgis2 ? I will wait to next version.
