

QGIS Application - Bug report #1756

In "Add Postgis Layer", renaming a connection does not works

2009-07-05 12:41 PM - Giovanni Manghi

Status:	Closed	
Priority:	Low	
Assignee:	Jürgen Fischer	
Category:	Data Provider	
Affected QGIS version:		Regression?: No
Operating System:	Debian	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 11816
Description		
<p>In the "Add Postgis Layer" dialog, if I try to rename an existing connection (edit) the connection is duplicated (with the new name) instead of being changed and to make it appear is needed first close the "Add Postgis Layer" and then reopen it.</p> <p>This happens also when creating the very first connection.</p> <p>No problems with the wms and wfs dialogs.</p> <p>QGis 1.2 rev. 11023</p>

I'm sorry,

this fix is 5 years old, I described an actual problem, unless it is a feature and not a bug. But I would be surprised.

#3 - 2009-07-11 01:03 AM - Marco Hugentobler

Sorry, I meant commit:5eac3451 (SVN r11041) / 11041
