QGIS Application - Bug report #17560
Attribute Table refresh issue: when there's only one row on attribute table, update buttons do not trigger table update.

2017-11-26 08:31 PM - sand thorn

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Attribute table			
Affected QGIS version:	2.18.14	**Regression?:**	No	
Operating System:	Windows 10 64-bit	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	fixed/implemented	
Crashes QGIS or corrupts data:		**Copied to github as #:**	25457	

Description

When there is only one row shown on attribute table,
"Update All" / "Update Filtered" / "Update Selected" button click event doesn't trigger attribute table refresh.
Corresponding column gets updated behind the scene, but not shown.

affected version: OSGeo4W-qgis-dev-2.18.14-13

History

#1 - 2017-11-26 08:33 PM - Giovanni Manghi

- Affected QGIS version changed from master to 2.18.14

#2 - 2017-11-28 12:32 AM - Giovanni Manghi

- Status changed from Open to Feedback

Still valid in 2.18.14-16 (as available now in osgeo4w)?

#3 - 2017-11-29 03:37 PM - sand thorn

Version: 2.18.14-16
Platform: Windows 10 64 bit

If the corresponding layer has more than 1 row, all 3 buttons (Update All/ Update Filtered/ Update Selected) are working now even though the attribute table is showing only 1 row through filtering or selection.

If the corresponding layer has only 1 row, all 3 buttons do not trigger refresh.

#4 - 2017-12-11 08:53 AM - sand thorn

All issues seem fixed since 2.18.15-1.
You may close this.

Thank you.
