

QGIS Application - Bug report #17573

WCS and WFS nodes in Browser Treeview show 'wrong' icons

2017-11-28 02:17 PM - Richard Duivenvoorde

Status: Closed	
Priority: Normal	
Assignee:	
Category: Data Source Manager	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: Yes
Pull Request or Patch applied: Yes	Resolution: fixed/implemented
Crashes QGIS or corrupts data: No	Copied to github as #: 25470
Description	
<p>There is some inconsistency in the use of icons in the browser/data source manager.</p> <p>The WMS shows a mlconConnect.png for every connection. And a mlconWms.svg for root node and layers</p> <p>The WFS though shows a mlconWfs.svg for the connections, but mlconConnect.png for the layers.</p> <p>The WCS always shows mlconWcs.svg</p> <p>I propose to do the WMS way (PR will be added)</p> <p>Test urls:</p> <p>WMS https://geodata.nationaalgeoregister.nl/bag/ows WFS https://geodata.nationaalgeoregister.nl/bag/wfs WCS https://geodata.nationaalgeoregister.nl/ahn3/wcs?</p>
