

QGIS Application - Bug report #17612

Values in form view appear as NULL

2017-12-03 08:16 PM - Saber Razmjooei

Status:	Closed	
Priority:	High	
Assignee:		
Category:	Attribute table	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: not reproducible
Crashes QGIS or corrupts data:	No	Copied to github as #: 25509
Description		
but are shown correctly in the table view		

History

- Status changed from Open to Closed

Magically it got resolved!

#2 - 2017-12-04 05:30 PM - Giovanni Manghi

- Resolution set to not reproducible

#3 - 2017-12-04 06:29 PM - Harrissou Santanna

- File attribute_form.PNG added

Magically it got resolved!

Are you sure, Saber :) ? Isn't it because you just switch to the form view after opening the attribute table (without "selecting" any feature)? I think it has always been this way.

I mean when you open the attribute table in view form, attributes are ALL shown 'NULL' given that no particular feature is "displayed". This is really confusing (took me time to figure out this dialog behavior). I think that attributes of the first feature in the list should be displayed instead of those empty fields.

I let Giovanni decide if it should be reopened.
