

QGIS Application - Feature request #1763
add r.external.all module

2009-07-06 01:09 AM - Paolo Cavallini

Status:	Closed	
Priority:	Low	
Assignee:	Lorenzo Masini	
Category:	GRASS	
Pull Request or Patch supplied:		Resolution: fixed
Easy fix?:	No	Copied to github as #: 11823
Description		
It would be good to add a module who takes all the rasters in a directory and register them all at once. Should be very easy.		

History

#1 - 2009-07-08 06:56 PM - Lorenzo Masini

- Resolution set to fixed
- Status changed from Open to Closed

Added qgis.r.external.all in commit:d6ebb464 (SVN r11034).

#2 - 2009-07-19 12:45 PM - Markus Neteler

Not clear how it works. From this report I understand that I should select a **directory** while the tool description says:

Raster file to be linked

I guess there is no way to override this original GRASS description in ./src/plugins/grass/modules-6.4/r.external.all.qgm?

#3 - 2009-07-19 11:35 PM - Paolo Cavallini

- Status changed from Closed to Feedback
- Resolution deleted (fixed)

A problem: when I load more than one raster produced with r.external, only the first one is shown.
As for the question of neteler, this has been corrected recently ()

#4 - 2009-07-28 08:30 AM - Magnus Homann

- Resolution set to fixed
- Status changed from Feedback to Closed

Without really knowing how, it appears to have been fixed in commit:a3c73889 (SVN r11193). Re-open if not.
