

## QGIS Application - Bug report #17632

### "money" type (postgresql) interpreted as string

2017-12-05 03:33 PM - Loïc BARTOLETTI

<b>Status:</b>	Open	
<b>Priority:</b>	Normal	
<b>Assignee:</b>		
<b>Category:</b>	Field calculator	
<b>Affected QGIS version:</b>	3.5(master)	<b>Regression?:</b> No
<b>Operating System:</b>		<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 25529
<b>Description</b>		
In composer and virtual field, I have this error.		
Try to add numeric fields and return NULL (decimal field for virtual field) or a string concatenation into composer.		

#### History

##### #1 - 2017-12-05 03:58 PM - Harrissou Santanna

Could it have to do with the € suffix in the fields ?

##### #2 - 2017-12-05 04:10 PM - Loïc BARTOLETTI

Sorry it's Money type from postgis and not a numeric field.

##### #3 - 2017-12-05 07:52 PM - Giovanni Manghi

- Subject changed from Addition of numeric type (postgis) interpreted as string to Addition of "money" type (postgis) interpreted as string

##### #4 - 2017-12-05 07:57 PM - Giovanni Manghi

- Subject changed from Addition of "money" type (postgis) interpreted as string to "money" type (postgresql) interpreted as string

##### #5 - 2019-01-21 12:34 AM - Jürgen Fischer

- Status changed from Open to Feedback

Please test with QGIS 3.4 - QGIS 2.18 reached it's end of life.

##### #6 - 2019-01-28 10:44 PM - Loïc BARTOLETTI

- Affected QGIS version changed from 2.18.14 to 3.5(master)

- Status changed from Feedback to Open

Confirmed in master
