

QGIS Application - Bug report #17638

DB Manager: Create Layer dialog should be closed or cleared once the new layer is generated

2017-12-05 08:23 PM - Harrissou Santanna

Status:	Feedback	
Priority:	Normal	
Assignee:		
Category:	DB Manager	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 25535
Description Open the DB Manager Select a gpkg database (i didn't test other formats) In Table Menu, select "Create a table" Fill the dialog and click Create You'll see the layer added to the database but the "create new layer" dialog is still open. It should either be open and cleared or closed. (unless it's by design, to help recreate new layers from the previous one? not sure what behavior is better)

The same is for PostGIS (and likely also Spatialite).

I think keeping it open is by design, to allow create other tables without having to reopen the dialog again. In this sense clearing the form make sense to me.

By the way that dialog has **still** the problem (reported in another ticket) that the CRS must be entered manually, it does not open the normal QGIS CRS selector.
