

## QGIS Application - Bug report #17645

### Python 3 support still lacking in QGIS 2.99???

2017-12-06 04:11 PM - vince -

<b>Status:</b>	Closed	
<b>Priority:</b>	Normal	
<b>Assignee:</b>		
<b>Category:</b>	Build/Install	
<b>Affected QGIS version:</b>	master	<b>Regression?:</b> No
<b>Operating System:</b>	OS X 10.13	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b> not reproducible
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 25542
<b>Description</b>		
<p>Guys,</p> <p>I'm not sure this is expected or no, but since it's nearly impossible to get up-to-date info about 2.99 on the web, here it is:</p> <p>I get "no Python support" on QGIS 2.99 in the Plugin dialogue. Is that normal?</p> <p>Compilation from source, the only relevant option I can see in the <i>ccmake</i> output is:</p> <pre>PYTHON_EXECUTABLE      /opt/local/bin/python3.6</pre> <p>Which is fine.</p> <p>Shall I set other python variables to make it work?</p> <p>Thanks!</p>

How did you installed master on macOS?

##### #2 - 2017-12-06 04:30 PM - vince -

Ciao Giovanni!

| How did you installed master on macOS?

I wrote a Portfile (for Macports) for it. It pulls out the master version corresponding to a given commit tag. Here is the excerpt of the Portfile:

```
set commit      1c1de3a
github.setup     qgis QGIS ${commit}
```

Then the package proceeds through the various configuration, build and installation stages and gives a perfectly functional Qgis3 app (3D works) but for Python support.

Niente di particolarmente difficile quà! :)

Cheers/Salutoni!

Ciao!

as others mac qgis/master users did not reported this I tend to think this a problem with the recipe you are using to install master. Please ask in the developers mailing list.

Thanks!

Fine. Will do that.

Grazie per l'aiuto!

V.
