Not reproducible here. I suggests it is a local problem. Please check and close it if appropriate, or report further details.

Bug reproduced by Tim Sutton also with kore / ubuntu.

I cannot replicate the problem with the cited modules.

Used qgis 1.2 from trunk and grass svn compiled from source on Ubuntu 9.04

Any update about this problem? Still not reproducible here, under Linux and Windows.

- *Resolution set to worksforme*
- *Status changed from Open to Closed*

Tested again on different platforms and boxes, and seems fine. I close this, but please reopen if necessary.
