QGIS Application - Bug report #17665
QGIS help is currently not available

2017-12-10 04:49 PM - Harrissou Santanna

Status:	Closed			
Priority:	High			
Assignee:	Yves Jacolin			
Category:	Documentation and Help			
Affected QGIS version:	master	**Regression?:**	Yes	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	fixed/implemented	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	25562	

Description

Hitting the help button in any dialog leads to the Oops page with

> *QGIS help is currently not available. This is likely because:*
>
> *No internet connection is available*
> *The offline help files are not available or the location of these files is not properly configured*
> *No help content is available for the requested topic*
>
> *Please check that the correct location of the offline help files is specified in the QGIS options dialog (Settings → Options →System).*

Settings are good and point to online doc (using the default link and a hard-coded https://docs.qgis.org/testing/en/docs/user_manual/)
I've tried on two different machines (self-compiled on xenial and osgeo4w last build on windows 10) and seems that it's not a local issue.
But can figure out where the issue resides.

History

#1 - 2017-12-12 09:38 AM - Richard Duivenvoorde

It was fixed commit:547744441244882ff41283c0200bae0fbda98def but broke again commit:678758c9baf6db386aff205301c037c67b5247e9

#2 - 2017-12-12 04:38 PM - Richard Duivenvoorde

- Resolution set to fixed/implemented

- Status changed from Open to Closed

commit:678758c9baf6db386aff205301c037c67b5247e9 is reverted

Clicking Help button now works \o/
