

QGIS Application - Bug report #17668

QGIS Server lost the ability to respond to GetMap requests for Groups

2017-12-11 06:57 AM - Tudor Bărăscu

Status: Closed	
Priority: High	
Assignee: Paul Blottiere	
Category: QGIS Server	
Affected QGIS version: master	Regression?: Yes
Operating System: Debian Stretch	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: fixed/implemented
Crashes QGIS or corrupts data: No	Copied to github as #: 25565

Description

If you have a group (let's say countriesgroup) in your project file, it is advertised as a layer in the WMS GetCapabilities but it cannot be accessed with GetMap or GetPrint anymore.

```
<ServiceExceptionReport version="1.3.0"><ServiceException code="LayerNotDefined">Layer "countriesgroup" does not exist</ServiceException></ServiceExceptionReport>
```

This is a regression as it worked on 2.x versions.

Steps to reproduce:

- Create a group in your project file
- Try and access that group with a GetMap request

Can you please attach a test project?

#2 - 2017-12-11 12:23 PM - Tudor Bărăscu

- File *bug_project.zip* added

Sure! I can replicate under several projects I've tested, under different machines.

So I'm assuming every project that has a group exhibits the same issue.

Thanks for looking into it.

#3 - 2017-12-15 05:03 PM - Paul Blottiere

- Assignee set to Paul Blottiere

#4 - 2018-01-18 11:23 AM - Pierre-Eric Pelloux-Prayer

- % Done changed from 0 to 100

- Status changed from Open to Closed

Applied in changeset commit:qgis|ac27347a9ea7dc176cd47231be119648c1b11ce7.

#5 - 2018-02-22 09:16 AM - Giovanni Manghi

- Resolution set to fixed/implemented
