

QGIS Application - Feature request #17690

[Styling Panel] Copy-paste a style from a layer to another one should be cancelable

2017-12-14 11:03 AM - Harrissou Santanna

Status:	Open	Resolution: Copied to github as #: 25587
Priority:	Normal	
Assignee:		
Category:	Symbology	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
<p>Let's take two layers</p> <p>Right-click, copy the style of the first one</p> <p>And paste it on the second layer</p> <p>Check the Undo/Redo tab in the second layer styling panel</p> <p>It's empty.</p> <p>I think that as an action impacting the styling, it should be cancelable as if it has been done in the panel ie, revert the whole styling (as one action) and rollback to the initial style.</p>
