QGIS Application - Bug report #17692
master 61db97f install breaks on debian stretch

2017-12-14 02:19 PM - Patrick Dunford

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	Unknown		
Affected QGIS version:	master	**Regression?:**	No
Operating System:	Debian 9	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	not reproducable
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	25589

Description

A poster to the Qgis-developer list has reported the apt errors for a new installation

The following packages have unmet dependencies:

 python-qgis : Depends: python-qgis-common (= 1:2.99.0+git20171211+61db97f+14stretch) but it is not going to be installed

            Recommends: liblwgeom-dev but it is not going to be installed

 qgis : Depends: qgis-providers (= 1:2.99.0+git20171211+61db97f+14stretch) but it is not going to be installed

     Depends: qgis-common (= 1:2.99.0+git20171211+61db97f+14stretch) but it is not going to be installed

 qgis-plugin-grass : Depends: qgis-plugin-grass-common (= 1:2.99.0+git20171211+61db97f+14stretch) but it is not going to be installed

E: Unable to correct problems, you have held broken packages.

From testing on my computer the apt-upgrade command refuses to install the most recent versions of

python-qgis-common

qgis-common

qgis-plugin-grass-common

qgis-provider-grass

qgis-providers-common

saying they have been held back. They can be installed only if qgis and 2 other packages are uninstalled.

Checking the package repository shows the versions of some of the packages mentioned are

Version: 1:2.99.0+git20171213+ea49c82+14stretch

In other words the repository does not contain the package versions needed for the install.

History

#1 - 2017-12-20 05:35 PM - Jürgen Fischer

- Resolution set to not reproducable

- Status changed from Open to Closed

1:2.99.0+git20171211+61db97f+14stretch is outdated - current builds are 1:2.99.0+git20171219+70d61fd+14stretch.
