QGIS Application - Bug report #17708
Custom SVG styles paths saved as absolute not relative

2017-12-17 10:55 AM - Patrick Dunford

Status:	Feedback		
Priority:	Normal		
Assignee:			
Category:	Symbology		
Affected QGIS version:	master	**Regression?:**	No
Operating System:	Debian 9	**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	25605

Description

This seems to be just happening in more recent masters

When you export out styles to a file then the SVG path is stored as the full path not a relative path

This makes no sense when the custom SVG file used for the style happens to be in the same path as the style xml file.
