

QGIS Application - Bug report #17732

Layout icon duplicated and atlas panel removed

2017-12-21 11:08 AM - laura costa

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	GUI	
Affected QGIS version:	master	Regression?: Yes
Operating System:	windows 7	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: wontfix
Crashes QGIS or corrupts data:	No	Copied to github as #: 25628
Description		
<p>On windows 7, lastest version of qgis 2.99, I've duplicated icons for layout.</p> <p>The first layout icon is the old version of the composer with some (or unique ?) new fonctionnalities like direct font access for legend. Atlas panel is present. All items are traduced in french</p> <p>The second layout icon bring me to the real 2.99 version, with a guide control panel, new icon like element width etc. But i don't find any panel or menu for create an atlas and some of news fonctionnalities are not traduced in french.</p> <p>Thanks</p>		

History

- Resolution set to wontfix
- Status changed from Open to Closed

This is on purpose. Please See <https://lists.osgeo.org/pipermail/qgis-developer/2017-December/051013.html>
Atlas feature is not yet reworked for the new layout...
