

QGIS Application - Feature request #17734

Keep label styling on switching to Rule-based labelling mode

2017-12-21 01:06 PM - Nikolay Lebedev

Status:	Closed	Resolution: fixed/implemented Copied to github as #: 25630
Priority:	Normal	
Assignee:		
Category:	Labelling	
Pull Request or Patch supplied:	Yes	
Easy fix?:	No	
Description		
<p>When you set up labels properties and then switch to rule-based, all styling gets discarded to default - background, shadows, etc. In contrast, when you switch from single symbol to rule-based symbology a first rule is added with all the styling preserved, so you can then duplicate rules.</p> <p>This strategy is very convenient and should be implemented for switching to rule-based labelling mode also.</p>
