

QGIS Application - Bug report #17750

Installing QGIS Server on Ubuntu/Debian

2017-12-26 07:53 PM - Tom Gertin

Status:	Closed	
Priority:	Low	
Assignee:		
Category:	Documentation and Help	
Affected QGIS version:	2.18.14	Regression?: No
Operating System:		Easy fix?: Yes
Pull Request or Patch supplied:	No	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	No	Copied to github as #: 25646
Description		
<p>In the pdf guide (https://docs.qgis.org/2.14/pdf/en/QGIS-2.14-UserGuide-en.pdf) it states:</p> <p>14.2.1 QGIS Server installation on Debian/Ubuntu</p> <p>At this point, we will give a short and simple sample installation how-to for a minimal working configuration using Apache2 on Debian Squeeze (or with negligible variations on Ubuntu 14.04). Many other OSs provide packages for QGIS Server, too. If you have to build it all from source, please refer to the URLs above.</p> <p>Firstly, add the following debian GIS repository:</p> <pre>\$ cat /etc/apt/sources.list.d/debian-gis.list</pre> <pre>deb http://qgis.org/debian trusty main</pre> <pre>deb-src http://qgis.org/debian trusty main</pre> <p>is cat the correct command?</p> <p>First of all doesn't exist on my machine, and second doesn't this cat command just display the contents of the file?</p> <p>Thanks,</p> <p>Tom</p>		

History

#1 - 2017-12-27 02:55 PM - Saber Razmjooei

- Affected QGIS version changed from 2.14.0 to 2.18.14
- Category changed from Build/Install to Documentation and Help

#2 - 2017-12-27 02:56 PM - Saber Razmjooei

- Subject changed from Installing Ubuntu Server to Installing QGIS Server on Ubuntu/Debian

#3 - 2018-02-19 02:40 PM - Harrissou Santanna

- Resolution set to fixed/implemented
- Status changed from Open to Closed

Fixed in 2.18 doc
