

QGIS Application - Bug report #17774

SSL error when launching QGIS

2018-01-02 05:20 PM - Jérémie Prud'homme

Status: Closed	
Priority: Normal	
Assignee:	
Category: GUI	
Affected QGIS version: 2.18.13	Regression?: No
Operating System: macos 10.13.2	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: fixed/implemented
Crashes QGIS or corrupts data: No	Copied to github as #: 25670
Description	
<p>Hello,</p> <p>I got an error window today when I launched QGIS 2.18.13 macos version, that I didn't had last year, on 31st december :)</p> <p>The window title is "Configuration d'un certificat personnalisé" in French, so something like "Personal certificate settings" in English. The error is on the URL https://ubuntu.qgis.org/version.txt</p> <p>I noticed that this one URL is not covered by the certificate in the info window when click on "connexion certificates" button.</p> <p>FYI, I checked this following a post on the french forum georezo (see here) on QGIS 2.14</p> <p>Any idea where this comes from ?</p>
