Description		
<p>It looks weird to me to have a main menu in the Layout dialog named "Add item". Actually, it's what is under the "Items" menu that bugs me.</p> <p>What about:</p> <ul style="list-style-type: none">- "Add Item" is renamed into "Items", providing means to add any type of item- "Items" is renamed into something like "(Re)Organize" (my preference goes here!), "Workplace", Rendering (?), because it provides tools to reshape how items will be placed and interact
