

QGIS Application - Bug report #17841

option to use live-updating color chooser dialogs is only partially implemented in QGIS 3 (i.e. only works from the top of the symbol tree)

2018-01-12 08:28 AM - Alister Hood

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	GUI	
Affected QGIS version:	master	Regression?: Yes
Operating System:	windows	Easy fix?: No
Pull Request or Patch supplied:		Resolution: invalid
Crashes QGIS or corrupts data:		Copied to github as #: 25736
Description		
<p>e.g.</p> <ol style="list-style-type: none">1. with this option enabled in the settings, style a polygon layer with a "simple fill".2. click in the symbol tree on "Simple fill", then click "Color" below to open the color chooser dialog. Click on a different color and the colors in the symbol tree and in the symbol preview area to the right will "live update".3. click instead on "Fill" in the symbol tree, then open the color chooser dialog. Click on a color and the colors in the tree and the preview will not live update. <p>This doesn't seem terribly important, but it is a regression from 2.18</p> <p>fa2aff18e5</p>

I think we should drop that setting - live colour edits are better done through the styling panel and other non- blocking dialogs.

#2 - 2018-01-12 09:17 PM - Alister Hood

Note that it is not talking about "live updating" on the **map canvas**, which I expected when I first saw the option. Given this, I don't know why anyone would ever want it turned off, but it is off by default in QGIS3.

#3 - 2018-01-19 03:19 AM - Nyal Dawson

- Resolution set to invalid
- Status changed from Open to Closed

This option has now been removed
