

QGIS Application - Bug report #17909

QGIS crash when counting features by value

2018-01-21 02:10 PM - Philippe Weber

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Editing	
Affected QGIS version:	2.18.15	Regression?: No
Operating System:	Windows 10	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: no timely feedback
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 25805
Description 1. open qgis 2. select a layer 3. count features by value (F3) 4. enter value 5. select feature (click) 6. open attribute table 7. toggle editing => crash or via 1. identify feature 2. identify results opens 3. toggle editing => crash		

History

#1 - 2018-01-21 04:10 PM - Jürgen Fischer

- Subject changed from *Absturz QGIS, Objekte nach Wert wählen* to *QGIS crash when counting features by value*

#2 - 2018-01-21 04:13 PM - Jürgen Fischer

- Description updated

Please file tickets in English.

#3 - 2018-01-22 03:46 PM - Denis Rouzaud

- Status changed from *Open* to *Feedback*

I cannot reproduce.

Do you have any plugin installed? If yes, can you try to disable them if it fixes the issue?

#4 - 2018-01-24 04:38 PM - Philippe Weber

- File *QGIS 2.18.16-1 print screen after crash.pdf* added

I made a new install with QGIS 2.18.16 with no plugin installed on it and it crashes again.

Crash short way:

- 1. open qgis
- 2. select a layer (shape)
- 3. count features by value (F3)(**must stay open**)
- 4. enter value
- 5. select feature (click)
- 6. toggle editing
- => crash

- 2. select a layer (shape)
- 3. count features by value (F3)(**must stay open**)
- 4. enter value
- 5. select feature (click)
- 6. toggle editing
- => crash

cannot replicate on 2.18.16 on Windows. Note: F3 = SELECT by value (not COUNT).

#6 - 2019-01-21 12:34 AM - Jürgen Fischer

Please test with QGIS 3.4 - QGIS 2.18 reached it's end of life.

#7 - 2019-02-11 12:24 AM - Nyal Dawson

- Resolution set to no timely feedback
- Status changed from Feedback to Closed
