Description

Hi there!

I'm trying to enter a path into the browser's filter of QGIS3 like:

"R:\geodata\myfiles", but the browser doesn't navigate to this address.

I also tried all kinds of slash escaping and variants "R:\\", "R:\/", "R:/" and "R://".

I've also tried all settings (regex etc.) but none come to the expected result.

Is this a bug or a missing feature?

Best regards,

Tobias
