QGIS Application - Bug report #17924
Missing layouts when upgrading from 2.18 to 2.99

2018-01-22 06:57 PM - Harrissou Santanna

Status:	Closed		
Priority:	High		
Assignee:	Nyall Dawson		
Category:	Map Composer/Printing		
Affected QGIS version:	master	**Regression?:**	Yes
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	fixed/implemented
Crashes QGIS or corrupts data:	Yes	**Copied to github as #:**	25820

Description

I have a long run project, full of print composers over the years.

Willing to try the layouts capabilities in 2.99, I open this project in master. It happens that it does not return all the print composers I had in the project. (see screenshots)

Also attach the project file without data (not sure they are relevant here and not all data could be made public - let me know)

Associated revisions

Revision 6eed7dea - 2018-01-24 07:50 AM - Nyall Dawson

[layouts] Fix remaining composers are not restored after hitting
a composer which could not be added

Refs #17924

Revision b8880d46 - 2018-01-24 07:50 AM - Nyall Dawson

[layouts] Handle duplicated composer names when upgrading 2.x
projects

Somehow 2.x projects could end up with compositions with duplicate
names. This is strictly forbidden in 3.x, so we autogenerate a
new unique name if we encounter any duplicate composer names when
upgrading a 2.x project.

Fixes #17924

History

#1 - 2018-01-23 02:00 AM - Nyall Dawson

- Regression? changed from No to Yes

#2 - 2018-01-24 07:50 AM - Nyall Dawson

- % Done changed from 0 to 100

- Status changed from Open to Closed

Applied in changeset commit:qgis|b8880d46cd967f8e1574df08b0c96c848b9d23e4.

#3 - 2018-01-30 09:36 AM - Harrissou Santanna

Thanks Nyall. Got them all and more :-)

#4 - 2018-02-21 09:47 PM - Giovanni Manghi

- Resolution set to fixed/implemented
