Crashes QGIS or corrupts data:		**Copied to github as #:**	11854	

Description

This bug happens in the print composer. When you activate a map frame and zoom repeatedly with the mouse-wheel without waiting for the previous zoom to finish, QGIS crashes.

Most mouse-wheels have concrete "steps" on the wheel. One step works fine, but two or more steps at once, without waiting for the previous zoom to finish makes QGIS crash

History

#1 - 2009-07-20 02:06 AM - Giovanni Manghi

Confirmed. But seems to happen only if you have vector data in your map. If you add just rasters, doesn't seems to crash.

#2 - 2009-07-27 02:07 PM - Giovanni Manghi

- Resolution set to fixed

- Status changed from Open to Closed

fixed in commit:9cb3b3ff (SVN r11187)
