

QGIS Application - Feature request #17953

Expression function editor UX improvements

2018-01-25 05:47 AM - Nathan Woodrow

Status:	Open	Resolution: Copied to github as #: 25849
Priority:	Normal	
Assignee:	Nathan Woodrow	
Category:	Expressions	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
<p>The new expression function editor is pretty cool and handy (totally no bias) but the UX is a bit crappy.</p> <p>Ideas for improvements:</p> <ul style="list-style-type: none">- Button on the function tree to add define new function. Should ask the user for a arg count, name, and group- Auto generate the file for the user using the name of the function.

Also need a way to test the function with inputs etc easier.
