QGIS Application - Bug report #17960
Coloring merged shapes by the Map Coloring plugin, ERRORS

2018-01-25 08:28 PM - Mikołaj Kosmalski

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Vectors			
Affected QGIS version:	2.18.4		**Regression?:**	No
Operating System:	Windows 8		**Easy fix?:**	No
Pull Request or Patch supplied:			**Resolution:**	invalid
Crashes QGIS or corrupts data:			**Copied to github as #:**	25856

Description

I use 2.18.4 version. I merged two polygon layers with the "Sum" tool and colored it with the plug-in "Map coloring" (
https://gitlab.com/Balaitous/mapcoloring). There are errors (colors neighbour each other):

http://www.wolniludzie.com/mapcoloring/screenshot1.jpg

http://www.wolniludzie.com/mapcoloring/screenshot2.jpg

Why this is happening?

link to the project: http://www.wolniludzie.com/mapcoloring/example.zip (Layers are numbered according to colored layer creating process)

I can give more project examples with this problem.

I wrote about it here: https://gis.stackexchange.com/questions/268764/coloring-merged-shapes-by-the-map-coloring-plugin-errors
but didn't get any answer.

History

#1 - 2018-01-25 08:32 PM - Nyall Dawson

- Resolution set to invalid

- Status changed from Open to Closed

You'll need to file this bug with the plugin itself - it's not related to the core qgis install.
