## Description

While looking for some old discussion on vertex editor, I found

http://osgeo-org.1560.x6.nabble.com/QGIS-Developer-QGIS-3-vertex-editor-problems-td5336971.html in which Regis said about the vertex editor

The use case I know is more typing z / m values easily than entering XY.

X/Y typing is not so difficult using the advanced editor panel (just type "x" then paste the X, "y" then paste). It requires less mouse clicks for sure than the node editor panel.

We maybe could add the z and m SpinBox with z and m shortcuts too there.

Given that it looks like a good idea to me, here's the feature request...
