

QGIS Application - Feature request #18001

Map decoration for 3D canvas

2018-01-30 12:06 AM - Saber Razmjooei

Status:	Open	Resolution: Copied to github as #: 25897
Priority:	Low	
Assignee:		
Category:	3D	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
It will be great to have at least scale bar and the north arrow for the 3d canvas.		

History

#1 - 2018-01-30 02:53 AM - Nyal Dawson

How would they work here (given that scale and bearing will vary with distance from observer)?

Possibly we could render them as "flat" items onto the ground surface, so that at least they'll be true at the rendered point and the user's eyes can estimate distances/bearings based on that...

Probably as a 3d axes showing x,y and z units.

And for north arrow, best to opt for xyz axes too.
