

QGIS Application - Bug report #18020

Minimal width of the "Report Organizer" panel is too big!

<b>Description</b>		
<p>See the screenshot attached, I can't reduce the width of that panel. I guess that it's because in-depth options can offer layer and field comboboxes and the panel is sized by default for this "full" configuration but on smaller screens, it consumes space. Better allow scrollbars (and maybe also reduce comboboxes size)</p>
