

QGIS Application - Bug report #18021

no refresh using notify in postgis

2018-02-01 01:33 PM - Lee Han

Status:	Open	
Priority:	Normal	
Assignee:		
Category:	Data Provider/PostGIS	
Affected QGIS version:	3.4.2	Regression?: No
Operating System:	windows 7	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 25917
Description		
following this : http://oslandia.com/en/2017/10/07/refresh-your-maps-from-postgresql/. I checked the two boxes in the rendering tab, and used 'refresh qgis' message. Then in a psql shell, I write listen qgis, I import a shp in my database, I write Notify qgis, 'refresh qgis' ; All that I get in return is : Asynchronous notification "qgis" with payload "refresh qgis" received from server process with PID 1848 And the canevas is unchanged. Did I miss something ? Postgres 9.3 ; qgis 2.99 ; windows 7		

History

#1 - 2018-08-27 07:36 AM - Sabin Kolarov

Postgresql 10.3 and QGIS 3.2.2-Bonn.: the bug is still present.

#2 - 2018-08-29 05:19 PM - Giovanni Manghi

- Affected QGIS version changed from master to 3.2.2

- Subject changed from no refresh using notify in postgis and qgis 2.99 to no refresh using notify in postgis

#3 - 2018-12-04 09:38 AM - Lee Han

- File Capture.PNG added

Qgis 3.4.2, postgres 9.6, postgis 2.3, windows 7

I followed the same method to get the map refreshed automatically but unsuccessfully.

I tried with an import **and** an update on a feature this time,

each time I wrote NOTIFY QGIS, 'refresh qgis' in psql,

no change in the map.

#4 - 2018-12-06 09:42 AM - Giovanni Manghi

- Affected QGIS version changed from 3.2.2 to 3.4.2
