QGIS Application - Bug report #18039
Hiding a Map View removes it from project without a warning.

2018-02-04 11:27 AM - Richard Duivenvoorde

Status:	Open		
Priority:	Normal		
Assignee:			
Category:	GUI		
Affected QGIS version:	3.1(master)	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	25935

Description

Creating an issue as asked in this thread:

https://lists.osgeo.org/pipermail/qgis-developer/2018-February/051830.html

Would be good to warn a user when he/she closes a mapview that it is not saved in the project anymore, something along the line of:
"Note: if you close this view, it will not be saved in your project"

I think this remark:
https://lists.osgeo.org/pipermail/qgis-developer/2018-February/051846.html
is not related is it? I think that is about a problem about saving floating widgets?

I've investigated - unfortunately it's not possible to do this without gross hacks. Qt provides no way to intercept the close event for dock widgets selectively - so we can only trigger a message box on ALL closes (including unwanted events like those triggered by loading a new project, closing qgis). I think that's a step back in UX.

#2 - 2018-03-03 09:32 PM - Giovanni Manghi

- Affected QGIS version changed from master to 3.1(master)
