

QGIS Application - Bug report #18068

QGIS-dev crashes after PyQt5 QComboBox.clear()

2018-02-09 04:24 PM - Ondrej Remes

Status:	Closed	
Priority:	High	
Assignee:		
Category:	Python bindings / sipify	
Affected QGIS version:	2.99(master)	Regression?: No
Operating System:	Windows 10 64bit professional	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: no timely feedback
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 25964
Description		
Hello, when i can clear item list in QComboBox used in custom attribute form, Qgis crashes without debug informations! Same situation occurs when i can remove items by QComboBox.removeItem() calling.

- Status changed from Open to Feedback

Can you share the form?

#2 - 2018-02-10 09:11 AM - Ondrej Remes

- File vloz_kere.ui added

okey, in attachment.

#3 - 2018-02-10 06:19 PM - Alessandro Pasotti

Cannot reproduce on master/linux with Qt 5.9.3

#4 - 2018-02-11 11:40 AM - Ondrej Remes

I'm sending part of code:

```
def vloz_kere(dialog, layer, feature):
    global myDialog
    myDialog = dialog
    fTAXON = dialog.findChild(QComboBox, "TAXON")
    fTAXON.editTextChanged.connect(refresh_combo)

def refresh_combo():
    fTAXON = myDialog.findChild(QComboBox, "TAXON")
    if fTAXON.count() is None or fTAXON.count() == 0 :
        pass
```

```

else:
    fTAXON.clear()
for key, value in druh.items():
    if str(fTAXON.currentText()) in value:
        fTAXON.addItem(value)

```

I try add condition for first use (fTAXON.count() is None or 0) but problem is not finished. Qgis frozes and be shutdown with no debug informations.

#5 - 2018-02-11 12:03 PM - Ondrej Remes

The problem occurs after start attribute form when i try type something in combobox, cursor is freeze for 3 - 4 seconds and the application crashes.
