QGIS Application - Bug report #18070
crash upon exit/qnetworkconfiguration destructor

2018-02-10 10:50 AM - landry Landry Breuil

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Network			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	no timely feedback	
Crashes QGIS or corrupts data:		**Copied to github as #:**	25966	

Description

Since a while, i get crashes/segfaults upon exit, and they're fully reproducible now:

    #0 0x00000369644ca427 in QNetworkConfiguration::~QNetworkConfiguration () from /usr/local/lib/qt5/./libQt5Network.so.2.2
    #1 0x00000369644cecec in QThreadStorage<QSharedNetworkSessionManager*>::deleteData () from
    /usr/local/lib/qt5/./libQt5Network.so.2.2
    #2 0x000003699d257a63 in QThreadStorageData::finish () from /usr/local/lib/qt5/./libQt5Core.so.2.2
    #3 0x000003699d426c16 in QCoreApplicationPrivate::cleanupThreadData () from /usr/local/lib/qt5/./libQt5Core.so.2.2
    #4 0x000003692902c8d2 in QGuiApplicationPrivate::~QGuiApplicationPrivate () from /usr/local/lib/qt5/./libQt5Gui.so.2.2
    #5 0x00000369918c0b8f in QApplicationPrivate::~QApplicationPrivate () from /usr/local/lib/qt5/./libQt5Widgets.so.2.2
    #6 0x000003699d454652 in QObject::~QObject () from /usr/local/lib/qt5/./libQt5Core.so.2.2
    #7 0x00000369918c2903 in QApplication::~QApplication () from /usr/local/lib/qt5/./libQt5Widgets.so.2.2

This is with master as of yesterday, qt 5.9.4, on OpenBSD. Just opening qgis, and exiting. Strange that the trace appeas to be only in Qt, i don't know what qgis codepaths lead to this

Hi Landry,

Do you still have this issue?

#2 - 2018-10-26 10:37 AM - landry Landry Breuil

3.2.3 **seems** fine :)

#3 - 2018-10-26 10:41 AM - landry Landry Breuil

Guess i spoke too fast.. not 100% reproducible, but in this session i only opened a file open dialog then exited qgis.
