<b>Description</b>		
<p>I came across this trying to trigger checkbox states based on other checkbox states with case-&gt;when default values to behave similar to radio buttons. No luck there, but came across this.</p> <p>Reproduction steps</p> <ol style="list-style-type: none"><li>1. Start new project</li><li>2. Add new scratch layer, no geometry</li><li>3. Add an integer field and save</li><li>4. In Attributes Form, select the field. Change Widget Type to Checkbox. Set checked state to 1, unchecked to 0. Apply. OK.</li><li>5. Re-open properties. Select the field. In default values, enter 1 (to default to checked state). Apply. OK.</li><li>6. Re-open properties. Select the field. CHECKED STATE OPTIONS ARE GONE!</li><li>7. Clear the default value. Apply. OK.</li><li>8. Re-open properties. Select the field. Checked state options return, but empty.</li><li>9. Could be there's a reasonable explanation for this?</li></ol> <p>Thanks!</p> <p><i>BTW, originally added this to #18075 but I'm not sure that is watched.</i></p>		

#### Associated revisions

Revision 0eda7766 - 2018-02-12 03:42 AM - Nyal Dawson

Fix loss of checkbox widget settings when a default expression is set

Fixes #18076
