QGIS Application - Bug report #18098

QGIS Master build b6ad920404: Flags for Layers in a group don't works properly

2018-02-14 07:48 AM - Antonio Viscomi

Status:	Closed		
Priority:	High		
Assignee:			
Category:	Map Canvas		
Affected QGIS version:	master	**Regression?:**	Yes
Operating System:	Windows 7 x64	**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	wontfix
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	25994

Description

Hi All,

I noticed that in 2.99 version:

1) When I have a group layer with the elements in, not flagged:

- I go to flag only the group then, the elements in remain not flagged and nothing appear on the Canvas (attached screenshot Group flag1);

2) Also in case of elements of a group flagged (screenshot Group flag2):

- I go to de-flag the group with elements in flagged then the elements remain flagged, but in this case, the elements disappear from Canvas correctly (screenshot Group flag3)

Best Regards

History

#1 - 2018-02-14 08:24 AM - Nyall Dawson

- Resolution set to wontfix

- Status changed from Open to Closed

This is by design in 3.0 - it allows a group to be toggled without resetting the checked layers inside that group.

You can ctrl+click the group to emulate the 2.x behaviour.
