QGIS Application - Bug report #18120
Download of capabilities failed: SSL handshake failed

2018-02-16 10:18 AM - Cristiano Giovando

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Web Services clients/WMS			
Affected QGIS version:	2.18.15	**Regression?:**	No
Operating System:	OSX 10.11.6	**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	no timely feedback
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	26014

Description

Trying to add a WMTS layer from OAM, I'm getting the following error (also see attached screenshot):

Download of capabilities failed: SSL handshake failed

Source WMTS URL: https://tiles.openaerialmap.org/5a82811a2553e6000ce5ac7b/0/90757d03-ecbb-42ad-aca3-2e14dfb8c62d/wmts

The service works fine in the same version on Windows. By doing some research, the problem might be related to how QGIS uses the system OpenSSL in OSX.

Any help is greatly appreciated!
