

QGIS Application - Bug report #18138

Z not supported when "Advanced Digitizing" is enabled

2018-02-19 09:10 AM - Loïc BARTOLETTI

Status:	Closed	
Priority:	Normal	
Assignee:	Loïc BARTOLETTI	
Category:	Digitising	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 26031
Description		
Snapping on geometry with Z is now fixed with the PR of Paul I have found a new problem with advanced digitizing tool. When this tool is activated, Z snapping returns z defalut value. Example: Two points (EPSG:3946): PointZ (1973856 5199413 1235) PointZ (1974313 5202020 1234) Create a Z linestring with advanced digitizing tool disabled: LineStringZ (1974313 5202020 1234, 1973856 5199413 1235) Enabled (1000 is my default Z): LineStringZ (1974313 5202020 1000, 1973856 5199413 1000) (maybe related with #18104)
