QGIS Application - Bug report #18156
I can not edit the DXF file. I am curious why this is happening. Is this a natural phenomenon?

Assignee:	Jürgen Fischer			
Category:	DWG/DXF import			
Affected QGIS version:	2.18.16	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	up/downstream	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	26049	

Description

I tried to edit the DXF file by importing it from Qgis, but the edit mode did not work. How can I activate edit mode? Can DXF switch to edit mode?
If not, I want to know why. Finally, is there a plug-in that can edit DXF files?

History

- Resolution set to up/downstream

- Status changed from Open to Closed

There is no in-place edit support for DXF (this would need to be added in the GDAL library). You'll need to save the layer to another format, such as shapefile and then edit.
