Category:	PyQGIS Console		
Affected QGIS version:	master	**Regression?:**	No
Operating System:	Windows	**Easy fix?:**	Yes
Pull Request or Patch supplied:		**Resolution:**	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	26062

Description

When python-console is open, i open the editor area, create a small script like:

    print("hello")

Running this file directly works fine, but if i save it, and the path contains special characters.

one solution would be to change line
exec(open(u'C:/åäö/testfile.py'.encode('utf-8')).read())
to
exec(open('C:/åäö/testfile.py').read())

This probably because default string behavior in Python 3
