

QGIS Application - Bug report #18218

Processing: use selected features no more available for GRASS tools?

2018-02-26 09:37 AM - Nelson José Silva

Status:	Closed	
Priority:	High	
Assignee:	Giovanni Manghi	
Category:	Processing/GRASS	
Affected QGIS version:	3.0.0	Regression?: Yes
Operating System:	Ubuntu 16.04	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 26109
Description		
In General Options of Processing does not appear the Use Selected Features as in previous versions.

History

#1 - 2018-02-26 10:21 AM - Nyal Dawson

- Status changed from Open to Closed
- Resolution set to invalid

It's moved - now it's set when running an algorithm.

Sorry for the noise. I was using a GRASS tool.

#3 - 2018-03-03 11:28 AM - Giovanni Manghi

- *Operating System deleted (Linux)*
- *Resolution deleted (invalid)*
- *Priority changed from Normal to High*
- *Status changed from Closed to Open*
- *Subject changed from Processing: use selected features to Processing: use selected features no more available for non native tools?*

Nyall Dawson wrote:

this option works/ed (up to 2.18) regardless of the provider (including plugins), now this is only available for native tools? if yes (I hope not) then is really a big problem.

#4 - 2018-03-03 11:32 AM - Giovanni Manghi

- *Category changed from Processing/QGIS to Processing/GRASS*
- *Subject changed from Processing: use selected features no more available for non native tools? to Processing: use selected features no more available for GRASS tools?*

I see now that in vector inputs the option "selected features only" is available for SAGA tools, but not GRASS. Moreover (maybe is a general issue) the option remain greyed out if the input layer is not the one that shows when the tool dialog opens.~

For GRASS is a matter of changing the description files or the change in the underlying Processing code?

That's a separate issue - already fixed

| *For GRASS is a matter of changing the description files or the change in the underlying Processing code?*

Not sure on the internals of the grass provider, but the fix is to change vector layer parameters to vector feature source parameters. It may be a simple search/replace.
